Coating waterproofing

ROOFS | SLABS | BALCONIES | TERRACES

BE SURE. BUILD SURE.

Due to their exposed location, balconies and facilities such as loggias and arcades are among the most heavily stressed components of a structure. Stresses due to temperature, humidity and intensive solar radiation, as well as mechanical and chemical stress arising from usage patterns, place high demands on such building add-ons. Car park decks are additionally exposed to direct abrasive wear by vehicles.

Application areas:

- flat roofs
- car park decks
- garage slabs
- balconies
- terraces

Kinetic Boost Technology®

Moisture-compatible coating system for extreme weather conditions

- Quickly walkable
- Highly crack-bridging
- UV stable
- 2-35 C°
- Applicable at high humidity
- European Technical Assessment
